

The Science of Full Moon Invocations

From Humanity's Heart to Hierarchy's Will

by Dadi Darshan Dharma

An opportunity to help a humanity in need, by invoking universal spiritual energies such as Light, Love, Liberty, Beauty and Goodwill.

A new approach to full moon group meditations that will certainly peak worldwide interest.

This unprecedented volume contains powerful invocations that can be used during each successive full moon, to aid humanity in canalizing the potent energies available only during this special time of the month. Helena Blavatsky and the Tibetan Master Djwhal Khul through Alice Bailey's writings, first introduced the art and science of invocation to the western world.

Full moon group meditations take place globally amongst many religions and spiritual faiths. This book will peak the interest of meditators around the world.

“In the present Aquarian Age, with the dynamic activation of Ray 7, everyone now needs to re-learn how to pray, or rather, intelligently learn how to rightly Invoke. The penchant for individualized prayer, must now make room for a group-centered approach, which must necessarily be more mentally-polarized.” says the author, Dadi Darshan Dharma.

And he adds: “The needs of Humanity are changing and the way of doing things must adapt itself to these evolutionary changes. For the ongoing welfare of humanity and for its progressive evolution, a group-approach and a mentally-polarized focus must be made, in order to request the requisite help and support needed from the Hierarchy of Masters.”

Dadi Darshan Dharma is known to many as a living Wisdom Teacher of rare caliber, always full of Divine sparklings, and is said to be giving out the very ancient Truth, in an East-meets-West modern tonality, and with an authentic resonance of the Real.

The Science of Full Moon Invocations: From Humanity's Heart to Hierarchy's Will
